**Subject:** RE: Farmingdale "Dangerous Monitoring Well" is not quite as dangerous as reported

Hello Jason, It seems as if Lorenzo will be out until Aug 24<sup>th</sup> and I wanted to respond as best I can. While Stan Carey IS accurate that a missing well cover is a liability and all monitoring wells should be fully secured, it is my personal opinion the subject regarding a "dangerous well" is inaccurate or at least exaggerated.

To the best of my knowledge, it is not an EPA monitoring well. The photo of the missing well cover shows that the inner casing consists of multiple small diameter casings. It's not Westbay or Flute design and may be Solinst, but I can't tell from the small picture. It looks fairly new. NYSDEC is currently installing some fairly deep monitoring wells downgradient of Bethpage Park as part of the old Claremont site. I'd suggest checking with Caroline Eigenbrodt, the NYSDEC RPM for that OU. It would be a good well for that site. At the least, perhaps their driller can provide a well cover until this is figured out.

Keep me posted, the only other suggestion I can offer is to run a permit check at Stony Brook based on the location.

Regards  
Rob Alvey

Rob/Lorenzo:

Can you let me know if this is one of your wells?

Thanks  
Jason

Hi Jason,  
Hope all is well and you are enjoying Summer.  
Was hoping you could help me track down who owns the attached monitoring well? See photo and map attachment. The cover is missing and it is dangerous.

127 Motor Ave, Farmingdale.

Thank you,

Stan Carey, Superintendent  
Massapequa Water District
